Christopher Tutor
Full Stack Web Developer

ct

Summary

- Focused and versatile web developer specializing in React
- Well versed in both front and back end portions of web application software
- Background in video game programming and development using C# and Unity 3D
- Strong understanding and ability to apply fundamental concepts of computer science
- Passionate and devoted to building skills in software development, particularly front end

Experience

2019 — Groovin Music

A **music recommendation** app. Groovn music generates a recommended playlist for users based on their **liked songs** on their **Spotify account**

Technologies Used

Front End

- react(hooks and context) - Apollo/GraphQL

Back end

- Mongo DB - GraphQL - Passport.js(Spotify strategy)

2019 — Potluck Planner App

An app for **planning and organizing potlucks**. Users can **create potlucks** with desired food items and **invite others** to attend. As an attendee, users can confirm or deny attendance as well as **claim food items** they would like to bring to the potluck.

Technologies Used

Front End

- React.js - Redux - Axios - SCSS

Back End

- MySQL DB - Knex - Express.js

2019 — Instagram Clone

Simply an **Instagram clone** to show off my react skills. Users can **log in** and **comment on the photos** in the feed.

Technologies Used

- React.js - Styled Components

2019 — Moms app landing page

This is the **landing page** for the Stay at Home Moms web app. The goal was to **showcase skills in UI** using basic front end technologies.

Technologies Used

- HTML - CSS - JavaScript - Less

2019 — Bucket List App API

This is the **back end** of the Bucket List App. This API allows all CRUD operations necessary for **creating and managing several bucket lists** per user. The API also handles **authentication** for the front end using JWT. The **database** schema is **perfectly normalized**.

Technologies Used

Node.js, JWT, Bcryptjs, Cors, Epress.js, Knex.js, Axios, SQLite DB

Education

02/2019 - 05/2020 — Lambda School

Full Stack Web Development

01/2013 - 06/2016 — Moorpark College

Game Development/Programming
